SQL

MIDDLEWARE & BACKEND DEVELOPMENT
Node.js
AWS
API Design
Firebase
GCP

PRODUCTIVITY TOOLS
Asana
Notion
Jira

Employment

Freelance
Software and Solutions Engineer

Georgetown, Colorado
Jan. 2021 to Current

· Consult with customers about software system design and maintenance.
· Analyze user needs and software requirements to determine feasibility of design within time and cost constraints.
· Automate website deployment and inventory integration using Shopify, Next.js, AWS Lambdas, and Notion.
· Develop integrations to optimize internal tooling for enterprise teams.

Formidable Labs
Software Engineer II

Denver, Colorado
Jan. 2019 to Sept. 2020

· Maintained an open-sourced React.js-based project for building interactive presentations through a rewrite of the library, modernizing the internal architecture and improving the authoring experience through an introduction of React hooks.
· Worked as an embedded engineer on various teams:
 · Was the primary developer for the payment and profile API systems for a Walmart-owned startup using Kubernetes, Node.js, and GCP.
 · Built a new dashboard for a digital currency platform using TypeScript and React.
 · Developed a brand-agnostic online ordering system for a multinational fast food company using AWS Lambdas and Next.js.
 · Released a major update to an international medical supply conglomerate's internal CMS using TypeScript, Next.js, and GraphQL.

Software Engineer I

Phoenix, Arizona
Jan. 2018 to Jan. 2019

· Helped to build a digital currency platform for trading cryptocurrencies and monitoring investments, using TypeScript and React.
· Worked with a Walmart-owned startup to build microservices that facilitate communication between a customer service interface and various backend services that were hosted over Firebase. Was the primary developer for various APIs, including our payment and profile systems. Technologies used include Kubernetes, Node.js, and GCP.
· Contributed to various Formidable OSS, including Victory, a React.js-based library for building informational SVG charts and diagrams.
· Spoke at various meetups and conferences about technologies that I work with, including a talk at the FormidaDenver Open House in October 2018 titled "How TypeScript Made Me a Better Developer".
· Helped with marketing initiatives, including introducing a standardized Code of Conduct for participation in Formidable's open sourced software and helping to manage Formidable's public Twitter profile.

Education

DevMountain
Certificate of Studies Web & Software Development 2017

Aug. 2017 to Nov. 2017

Virginia Commonwealth University
No Degree Forensic Chemistry

Aug. 2012 to May 2014
